Employment History

- 2024 – **Flutter Developer and Healthcare Business Analyst**
eGeneration Ltd.
- 2021 – **Database Administrator**
eGeneration Ltd.
- 2020 – 2021 **Inspection Officer**
Akij Group Ltd.
- 2019 – 2020 **Lecturer**
National Institute Of Engineering And Technology

Academic Qualification

- **BSc. in Computer Science and Engineering (CSE)**
Bangladesh Army University of Science And Technology
GPA : 3.84 out of 4.00
- **HSC , Science**
Cantonment Public School And College, Rangpur
GPA : 5.00 out of 5.00
- **SSC , Science**
Rangpur Zilla School, Rangpur
GPA : 5.00 out of 5.00

Projects

2025 –

■ Popular Healthcare (Flutter,Dart)

Developed a a full-featured Healthcare app enabling online Doctor Appointments,EHR Management and secure access to Prescription and Appointment history via QR scanning.it provides patients a unified platform to manage their medical data efficiently and digitally.

■ GIS Dashboard For UNICEF (Flutter, Riverpod)

Developed a Flutter-based GIS dashboard for UNICEF to analyze and visualize nationwide vaccination coverage across Bangladesh. The application integrated multiple API endpoints for key vaccines (BCG, Penta, etc.) and displayed real-time data on interactive maps for strategic campaign monitoring. Implemented features for filtering, analytics, and location-based insights to support data-driven decision-making. Delivered a robust, intuitive platform that enhanced the tracking of immunization progress and resource allocation.

■ Hospital Management portal for patients and Doctors(React ,PostgreSQL)

Developed an integrated hospital management portal using React for web, allowing patients to book online appointments and communicate directly with doctors via real-time chat. Enabled doctors to manage schedules, issue digital e-prescriptions, and maintain patient records within a unified dashboard. Implemented a secure, responsive platform that streamlined clinic workflow and improved patient engagement.

■ Celebrity Communication APP (Flutter, Riverpod)

Developed a Flutter-based mobile application for a celebrity to engage with fans by showcasing upcoming events and enabling direct communication. The app allows fans to message the celebrity individually and receive announcements and notifications. Features include a real-time chat functionality, event management, and a personalized dashboard for both the celebrity and fans to interact. Implemented an intuitive UI/UX to enhance user experience. Ensured seamless integration of push notifications for timely updates. Delivered the project with a focus on performance, scalability, and user engagement.

Projects (continued)

■ Shop Management and e-commerce offline APP (Flutter,Getx)

Developed a Flutter-based shop management and e-commerce application with full offline functionality, enabling retailers to process sales, manage inventory, and generate invoices without an internet connection. Implemented secure local data storage and automated background sync to update records and orders once connectivity was restored. The app included customer management, low-stock alerts, and sales analytics to support data-driven business decisions. Delivered a reliable solution that minimized downtime and ensured seamless store operations in areas with unstable internet.

■ Emi Management system with qr provisioning app (Flutter,Getx)

Developed a Flutter-based EMI management system enabling mobile businesses to generate and scan QR codes for installment plan activation and payment collection. The app featured transaction tracking, customer EMI schedule management, and automated payment reminders. Implemented secure offline-first functionality to ensure reliable operation in low-connectivity areas. Streamlined the credit process, reducing manual errors and improving repayment tracking for small business owners.

2024 – 2025

■ Sylhet MAG Osmani Medical Hospital Management Project (Java and Postgres)

This project Basically for the digitization of whole Sylhet MAG Osmani Medical Hospital management system into a software.

■ Evercare Hospitals Bangladesh Report Management (Power BI and SQL Server)

The project enhances report generation by integrating Power BI with a SQL Server database, focusing on healthcare data from Evercare Hospitals Bangladesh. It involves data extraction, transformation, and accuracy validation, followed by visualization through interactive Power BI reports. These reports offer real-time insights into hospital operations, patient care, and financial performance, aiding data-driven decision-making.

Projects (continued)

2021 – 2025  **Border Guard Bangladesh (BGB) Hospital Management Project (Java and Postgres)**

This project Basically for the digitization of whole BGB hospital management system into a software.

2021 – 2022  **Covid-19 Dashboard For Honourable Prime Minister (Java and Postgres)**

This project is for getting all data into an website for all over country about Covid-19 . Through this website everyone can know the Covid situation.

Miscellaneous Experience

Awards and Achievements

2017  **Quater Finalist**

ICT QUIZ Contest, BAUST

Certification

2025  **App Development with Flutter**

Ostad

2024  **Quick Start Your Flutter Journey**

Ostad

 **Coding Problem Solving**

Ostad

 **Complete Flutter App Development Bootcamp with Dart**

Udemy

2023  **PostgreSQL Database Administration on Windows/Linux**

Udemy

 **SQL Server Administration**

Udemy

2022  **SQL Basic**

HackerRank

Skills

Coding	▪ Dart, Flutter
Databases	▪ Postgres ,MySQL , SQL , SQL Server
Management tool	▪ Git ,Gitlab , Github , Jira ,Trello
Soft. Dev	▪ API Integration,GetX
Misc.	▪ Academic research, Teaching, Training, Consultation, Typesetting and Publishing
